

# Logistics Solutions

We implement and manage client-specific logistics processes and risks.

## Improving productivity and efficiency

### PARTNER OF CHOICE

If you are looking for a logistics partner, Carrus Logistics has the expertise, the integrity and the track record to be your peace of mind partner of choice.

We are small enough to value the strategic importance of your business, yet large enough to exceed your expectations.

### Our Solutions:

- Supply chain network including transport, delivery, local distribution and fleet management.
- Warehousing including stock control, receiving, dispatch, loading and storage.

### Holistic Approach to Risk

Our expert risk control integrates finances, assets, operations and people.

This includes:

- The handling of human resource such as payroll and employee leave, labour relations and legal compliance plus expert consulting in industrial relations and labour law.
- The deployment of experienced qualified teams under outcomes-based management.
- The implementation of flexible, world-class methodologies, technologies and IT systems.

### Sustainable Business Partnerships

We believe in creating sustainable strategic business partnerships with our clients by:

- Maintaining a clear and realistic view of our clients' specialised logistics processes as crucial to the success of their overall businesses.
- Sharing the financial gains of business process optimisation.

As a level 3 BBBEE contributor with an excellent track record in safety and risk mitigation, Carrus Logistics offers solutions that reduce costs while simultaneously improving service levels.

We implement custom-designed processes that expand the capacity and utilisation of existing resources and assets by improving productivity and efficiency.

Our service level agreements have clearly specified outcomes based on a scientific rate model which incorporates service levels, deliverables planning, costing, assets, stock and supervision.

## Reducing cost by managing risk
