

Fleet Management Solutions

Custom-made solutions to reduce your costs, limit risk and improve service flexibility.

Reducing costs and limiting risk

PARTNER OF CHOICE

If your business is the management of a fleet, Carrus Fleet Management has the expertise, the integrity and the track record to be your peace of mind partner of choice.

We are small enough to value the strategic importance of your business, yet large enough to exceed your expectations.

Service Differentiators

Our diversity and infrastructure give us the ability to:

- Implement and operate Fleet Risk Operations Control Centres.
- Integrate your existing investments into our systems.
- Implement processes and systems to consolidate various data sources.
- Customise fleet management systems for your unique business.

Furthermore, we have taken the decision to associate with 'best of breed' and align with market-leading technologies, such as MiX Telematics, Matrix, VDO and SAP.

A successful fleet function relies on world class technology, highly skilled and committed employees and win-win partnerships with all stakeholders. At Carrus Fleet Management we understand these principles and have custom-made solutions to reduce your cost, limit your risk and improve service flexibility.

We are a level 3 BBBEE contributor and a SAP business partner offering a total solution, while at the same time managing risk.

Control Centre Functionality

Carrus Fleet Management offers ingenious solutions for today's fleet management needs via our Fleet Risk Operations Control Centre.

This is a centralised approach that reduces the risk of the entire fleet management function, customised to specific user requirements.

The functionality of the FROCC is divided into user friendly functions and provided on visual dashboards for ease of use.

- Vehicle on board computer risk control.
- Tyre management.
- Asset and Maintenance management.
- Fleet Management Service.
- Operational Management – vehicle, driver.
- Route Management.

Reducing cost by managing risk
